

## Declaration of compliance for semi-finished products intended to come into contact with food

Vink Plast ApS hereby declare that:

### FCM\*\* Compact CGS Hvid/Sort/Hvid TF/TF FKM (1)

is intended to come into contact with food and:

- Comply with the requirements of the Regulation (EC) No. 1935/2004 of 27 October 2004
- Comply with the relevant requirements of the Regulation( EU) 10/2011 as amended up to and inclusive Regulation (EU) No. 2020/1245
- Are manufactured and handled according to good manufacturing practice (GMP) as set out in the Regulation (EC) 2023/2006 of 22. december 2006 on good manufacturing practice for materials and articles intended to come into contact with food.
- Vink Plast Comply with Danish Regulation no. 1248/2018 as amended in no. 681/2020

#### 1. Determination of the Overall Migration

The determination was carried out according to the methods for the "Examination of consumer goods" corresponding to directives B 80.30, 1 to 3 (EG) of the Official Collection of Analytical Methods according to § 64 LFGB and according to the rules of the series of standards EN 1186 end EN 13130. The choice of the tests stimulants as well as the contact conditions was performed according to requirements of annex III and V of Commission Regulation (EU) No 10/2011 on "Plastic materials and articles intended to come into contact with food".

If not stated differently, the results are given as average values of determination in triplicate.

Conditions: 10 days at 60°C

Test stimulants: Acetic acid, 3 % (W/W) (foodstuff stimulant B)  
Ethanol 10% (v/v) (foodstuff stimulant A)  
Ethanol 50% (v/v) (foodstuff stimulant D1)  
Ethanol 95 % (v/v) (Screening)  
Tenax ® (foodstuff stimulant E)

Testing procedure: One-sided contact (coated side)

Results:	Acetic acid 3 % (w/w):	not determinable < 2 mg/dm <sup>2</sup>
	Ethanol 10 % (v/v):	not determinable < 2 mg/dm <sup>2</sup>
	Ethanol 50 % (v/v):	not determinable < 3 mg/dm <sup>2</sup>
	Ethanol 95 % (v/v):	not determinable < 2 mg/dm <sup>2</sup>
	Tenax ® <sup>1)</sup> :	not determinable < 2 V

<sup>1)</sup> The portion adsorbed onto tenax was determined gravimetrically after extraction with diethyl ether. A single determination was carried out.

\*\* FCM = Food Contact Material (In Danish FKM = Fødevare Kontakt Materiale)

It remains the responsibility of the customer putting the plastic article manufactured from the products into the intended use, to assess the final suitability of the plastics material for the intended food contact application; i.e. checking if the physical properties of the plastics material make it suitable for the intended application, checking compliance of the finished plastics article with the relevant migration limits, checking for possible influence of the plastics material on the composition and/or organoleptic properties of the contacting foodstuff, etc.

(1) This declaration expires in case of regulatory or compositional changes which require re-evaluation. Please always contact Vink Plastic' customer service for latest version.

For information about available dimensions, please contact Vink Plast' customer service.
