

PA

Slidstyrken og støjdempering gør PA - også kaldet polyamid eller nylon - til favoritten når industrien har brug for halvfabrikata.

PA anvendes typisk til:

- Lejer, tandhjul og koblinger
- Wireruller og lignende maskinelementer
- Emner hvor slidstyrke og mekaniske egenskaber er afgørende

PA 6G, emnerør

Kvalitet: Støbt

Farve: Natur og sort

Vægtfylde: 1,14 g/cm³

Alle vægte er gennemsnitlige produktionsvægte
Dimensioner > Ø500 op til Ø1250 mm leveres på forespørgsel
Kan også leveres med tilsætning additiver som f.eks. Olie, MOS2, Varmestabilisator samt PE.
Kan leveres i forskellige farver på forespørgsel.
