

DECLARATION, ADDITIVES OF ANIMAL ORIGIN – TSE/BSE

Date: 12.08.2022

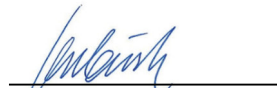

Vink Plast ApS distributes and produces semi-finished plastic products. The vast majority of our products are manufactured within the EU.

We hereby declare, to the best of our knowledge and based on information from our suppliers, that the materials are of petrochemical origin. In the event that additives originate from animal by-products, they are processed at temperatures above 200 °C for extended periods during the manufacture of the raw materials and again during the production of the semi-finished plastic products.

Based on these manufacturing conditions and in light of the requirements in the documents WHO/CDS/VPH/95.145 and EMEA/410/01 rev. 3 – July 2011, the transmission of BSE (Bovine Spongiform Encephalopathy) and TSE (Transmissible Spongiform Encephalopathy) should therefore be considered excluded from Vink Plast's semi-finished plastic products.
