SVHC Candidate List (Substances of Very High Concern) Compliance with the REACH Regulation

The SVHC Candidate List (Substances of Very High Concern) is published by the European Chemicals Agency (ECHA) to ensure compliance with the REACH legislation (Registration, Evaluation, Authorization, and Restriction of Chemicals).

According to the REACH regulation, the products manufactured and supplied by Digidelta to its customers are defined as “articles,” meaning “an object which during production is given a specific shape, surface, or design that determines its function to a greater extent than its chemical composition.”

In this regard, Digidelta is classified as a downstream user. Our products are not subject to registration under the SVHC Candidate List. Digidelta’s commitment to REACH involves regular communication and continuous updates on substances registered by our customers.

Manufacturers and importers are required to declare the presence of these substances in their products when their concentration exceeds 0.1% by weight (w/w) and to inform their customers accordingly.

Based on information received from our suppliers up to this date, and considered reliable, we declare that our products do not contain any SVHC substances listed on the Candidate List in concentrations equal to or above the allowed threshold.

For more information, please contact us or consult the SVHC Candidate List on the ECHA website.
